

Accessible EPUB QC Report

Review date: 10 October 2026

Sample: accessible-epub-sample.epub

Four-chapter original demonstration for vendor capability evaluation. The file digest below identifies the exact EPUB checked.

Official validation

EPUBCheck 5.4.0 completed with **0 fatal errors, 0 errors, 0 warnings and 0 informational messages**. The raw output is on page 2 and supplied as a separate text file.

Check	Verified result
ZIP and XML	No corrupt entries; mimetype first and uncompressed; 11 XML-family documents parse
References and IDs	40 local references; 0 missing targets; 0 duplicate IDs
Package and chapters	7 spine resources resolve; chapters 1, 2, 3, 4 in order
Language and headings	Document titles and language declarations present; no skipped heading levels
Contact and alternatives	5 live email links; meaningful images have non-empty alt text
Accessible structure	Captioned table with row/column scope; described workflow; note return link; metadata reviewed

File identity (SHA-256)

3a1d71b912b2abd7c71a6049effb2376
909e03eebf0469e1ee36672e1d07e063

Clear checks. Clear limits.

What is demonstrated

Chapter 1: structure and language. Chapter 2: workflow image, alternative text and detailed description. Chapter 3: table, note and cross-reference relationships. Chapter 4: metadata and quality workflow. These are original examples, not a conversion of a supplied source PDF.

Accessibility review performed

XHTML and SVG parse; descriptive image alternatives; table caption and scoped headers; valid ARIA ID relationships; semantic heading order; linked footnote and return target; complete chapter navigation. Accessibility metadata describes actual features and the unperformed tests. No WCAG level or certification is declared.

Remaining acceptance checks

DAISY ACE is not installed and was not run. Screen-reader testing, font substitution, reading-system layout, zoom/reflow and color behavior were not tested here. The Tamil language sample requires a reading system with suitable glyph support.

Corrections resolved before final validation

EPUB navigation labeling was reduced to the supported markup with explicit headings. The workflow diagram uses separated arrows and includes an adjacent textual description.

RAW EPUBCHECK 5.4.0 OUTPUT

Validating using EPUB version 3.4 rules.

No errors or warnings detected.

Messages: 0 fatals / 0 errors / 0 warnings / 0 infos

EPUBCheck completed

Authoring references: W3C EPUB 3.3; EPUB Accessibility 1.1. Structural validation does not establish accessibility conformance or reading-system compatibility.
