

Fixed-Layout EPUB QC Report

Review date: 09 October 2026

Sample: fixed-layout-sample.epub

Original demonstration content for vendor capability evaluation. This report identifies the revised file and the checks performed on it.

Requested correction

A new terracotta cover retains the title and brand. The email was added as live footer links on all four body pages. Chapter order remains 1 through 4. The LIVE callout remains centered in its 210 px circle; the viewport and body text are retained.

Official validation

EPUBCheck 5.4.0 was run on the revised EPUB. Result: **0 fatal errors, 0 errors, 0 warnings and 0 informational messages**. The raw execution output is reproduced on page 2 and supplied as a separate text download.

Check	Verified result
ZIP packaging	No corrupt entries; mimetype first and uncompressed
XML/XHTML	8 XML-family documents parse
Local targets	25 references checked; no missing targets
IDs and fragments	No duplicate IDs or unresolved fragment links
Manifest/spine	5 spine entries resolve to manifest resources

File identity (SHA-256)

43f59df9ada9022f6f6b278c0597dd40

8f18f6b69e6595236fc6d7b456ea8508

Clear checks. Clear limits.

Accessibility scope

DAISY ACE and screen-reader testing were not performed for this revision. EPUBCheck and structural checks do not establish accessibility conformance or reading-system compatibility.

Layout verification

The new cover is a 1086 x 1448 px PNG, matching the 3:4 viewport ratio. The live footer email sits on a separate line within the 90 px footer. CSS retains horizontal and vertical centering of LIVE. Post-update rendering in the client reading system was not performed here.

Retained fixed-layout structure

Five spine pages; 1200 x 1600 portrait viewport; pre-paginated rendition metadata; cover artwork and live/selectable body text. The cover artwork, footer contact markup, footer CSS and OPF modification timestamp were updated. Main body content, chapter headings, page order and link destinations were retained.

Raw EPUBCheck 5.4.0 output

```
Validating using EPUB version 3.4 rules.  
No errors or warnings detected.  
Messages: 0 fatals / 0 errors / 0 warnings / 0 infos
```

EPUBCheck completed

Before client acceptance

Open the updated EPUB in the client-selected reading systems, confirm visual presentation and assistive-technology behavior, run the required accessibility toolchain, and verify customer-specific acceptance rules.
