

Reflowable EPUB QC Report

Review date: 09 October 2026

Sample: checked-reflowable-sample.epub

Original demonstration content for vendor capability evaluation. This report identifies the revised file and the checks performed on it.

Requested correction

Index links now follow Chapter 1, 2, 3, 4. The visible Sample Project ID was removed and the email added to title and notice pages. The workflow image has separated arrows, wrapped labels and reduced blank padding. A new emerald cover retains the title and brand.

Official validation

EPUBCheck 5.4.0 was run on the revised EPUB. Result: **0 fatal errors, 0 errors, 0 warnings and 0 informational messages**. The raw execution output is reproduced on page 2 and supplied as a separate text download.

Check	Verified result
ZIP packaging	No corrupt entries; mimetype first and uncompressed
XML/XHTML	11 XML-family documents parse
Local targets	46 references checked; no missing targets
IDs and fragments	No duplicate IDs or unresolved fragment links
Manifest/spine	8 spine entries resolve to manifest resources

File identity (SHA-256)

201323cf1b7874f432f72cbdee5aa6f8
29d0b1be18a86634de6902ada5f8a40f

Clear checks. Clear limits.

Accessibility scope

DAISY ACE and screen-reader testing were not performed for this revision. EPUBCheck and structural checks do not establish accessibility conformance or reading-system compatibility.

Source comparison

The prior source review remains relevant: this is an expanded portfolio edition, not a source-identical conversion. The reference PDF has three QC bullets absent from the EPUB; the EPUB adds a sidebar, note, cross-references and revised delivery wording. Sample logical page markers do not reproduce the reference PDF physical pagination. This revision changes the index order, title/notice contact details, cover, workflow image and figure spacing. Main chapter text and existing navigation destinations are retained.

Fonts and content

System serif/sans-serif stacks are used; no embedded fonts are present. Chapter markup, table headers, figure descriptions, navigation targets and footnote relationships were preserved. The cover is now a 1024 x 1536 px PNG; the workflow is a 1600 x 300 px PNG. Both decode correctly, have alt text and retain the intended proportions. Post-update reading-system rendering has not been tested here.

Raw EPUBCheck 5.4.0 output

Validating using EPUB version 3.4 rules.
No errors or warnings detected.
Messages: 0 fatals / 0 errors / 0 warnings / 0 infos

EPUBCheck completed

Before client acceptance

Open the updated EPUB in the client-selected reading systems, confirm visual presentation and assistive-technology behavior, run the required accessibility toolchain, and verify customer-specific acceptance rules.
